Features and Functionality

The background is a vibrant, stylized illustration of a city street. It features large, rounded green trees, modern grey buildings, and a clear blue sky with soft white clouds. In the foreground and middle ground, several people are engaged in cleaning activities: a man in a green shirt and dark pants is sweeping the sidewalk with a broom; another man in a green shirt is bending over, picking up trash; a woman in a green shirt is pushing a green trash cart; and a woman in a green shirt is sweeping the sidewalk with a broom. A green street sweeper vehicle is also visible on the road. The overall scene conveys a sense of community involvement and urban maintenance.

Complaint Reporting

Submit with photo, location & description.

Automatic Reporting

Complaints sent to correct authority/volunteer.

Real-time Tracking

Users can track status updates.

***Community
Engagement***

Voting & comments on issues.

***Secure
Authentication***

Manage users, complaints, and generate reports.

***Secure
Authentication***

Role-based login (user, volunteer, admin).

Outcomes and Impacts

Streamlined Reporting

- **Faster escalation of civic issues.**

Increased Transparency

- **Status updates visible to all stakeholders**

Enhanced Citizen Engagement

- **Community voting & comments.**

Better Governance

- **Admins can analyze complaints & trends.**

Role-Based Registration & Portal Access

The background of the slide is a vibrant, stylized illustration of a city street. It features large, rounded green trees, modern buildings in the distance, and a clear blue sky with a few white clouds. In the foreground, several people are engaged in cleaning activities: a man in a green uniform and cap sweeps the sidewalk, another person in a green shirt is bending over to pick up trash, a green street cleaning vehicle is visible, and a woman in a green sweater is sweeping the curb. The overall scene conveys a sense of community and civic responsibility.

1

User Registration and login:

New users can easily register by entering their details, edit profile, report a new issue, vote, comment and view the status of previously reported civic issues

2

Admin Portal:

Admins can access their portal to view complaint submissions, update statuses, and generate reports on unresolved civic issues

3

Secure Authentication:

Each user's password is securely stored using hashing to prevent unauthorized access

How challenges were addressed

**Architectura
/
Design:**

Scalable, modular MERN-based system.

**Data
Security:**

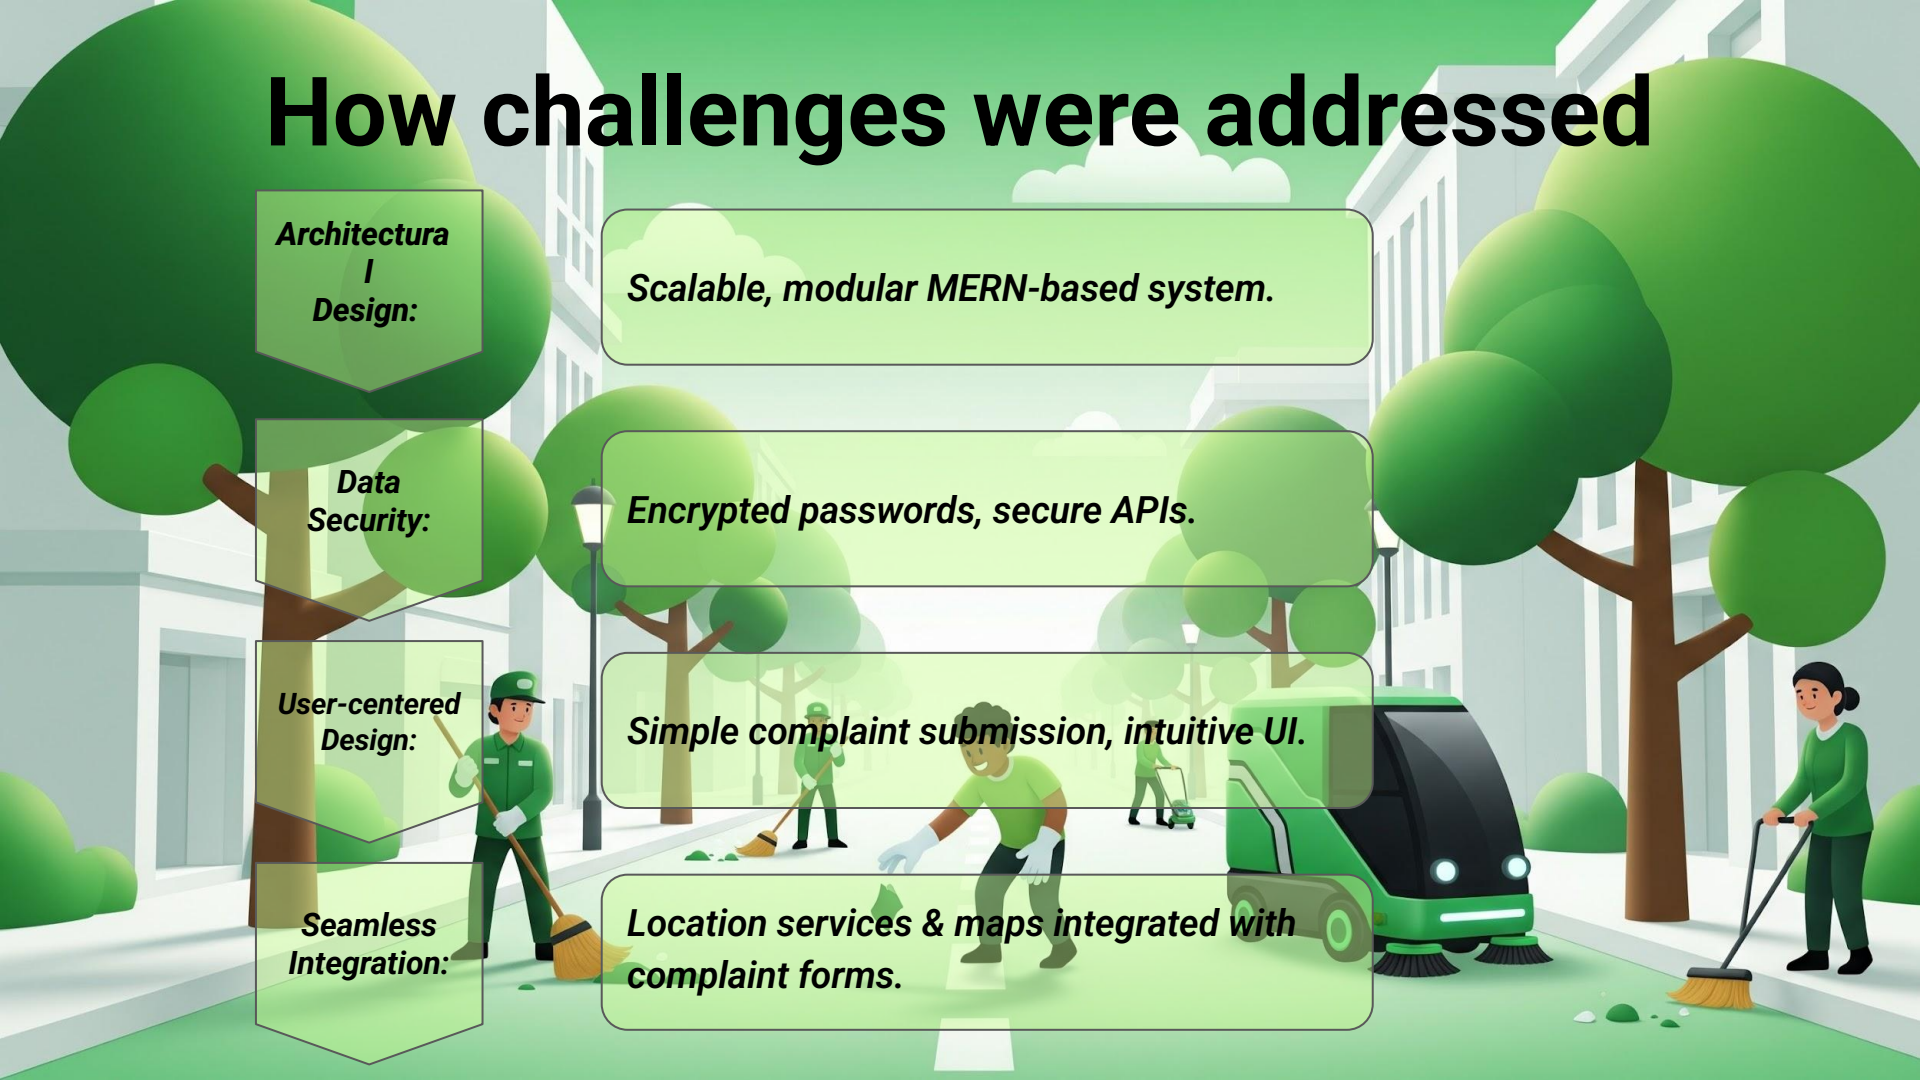

Encrypted passwords, secure APIs.

**User-centered
Design:**

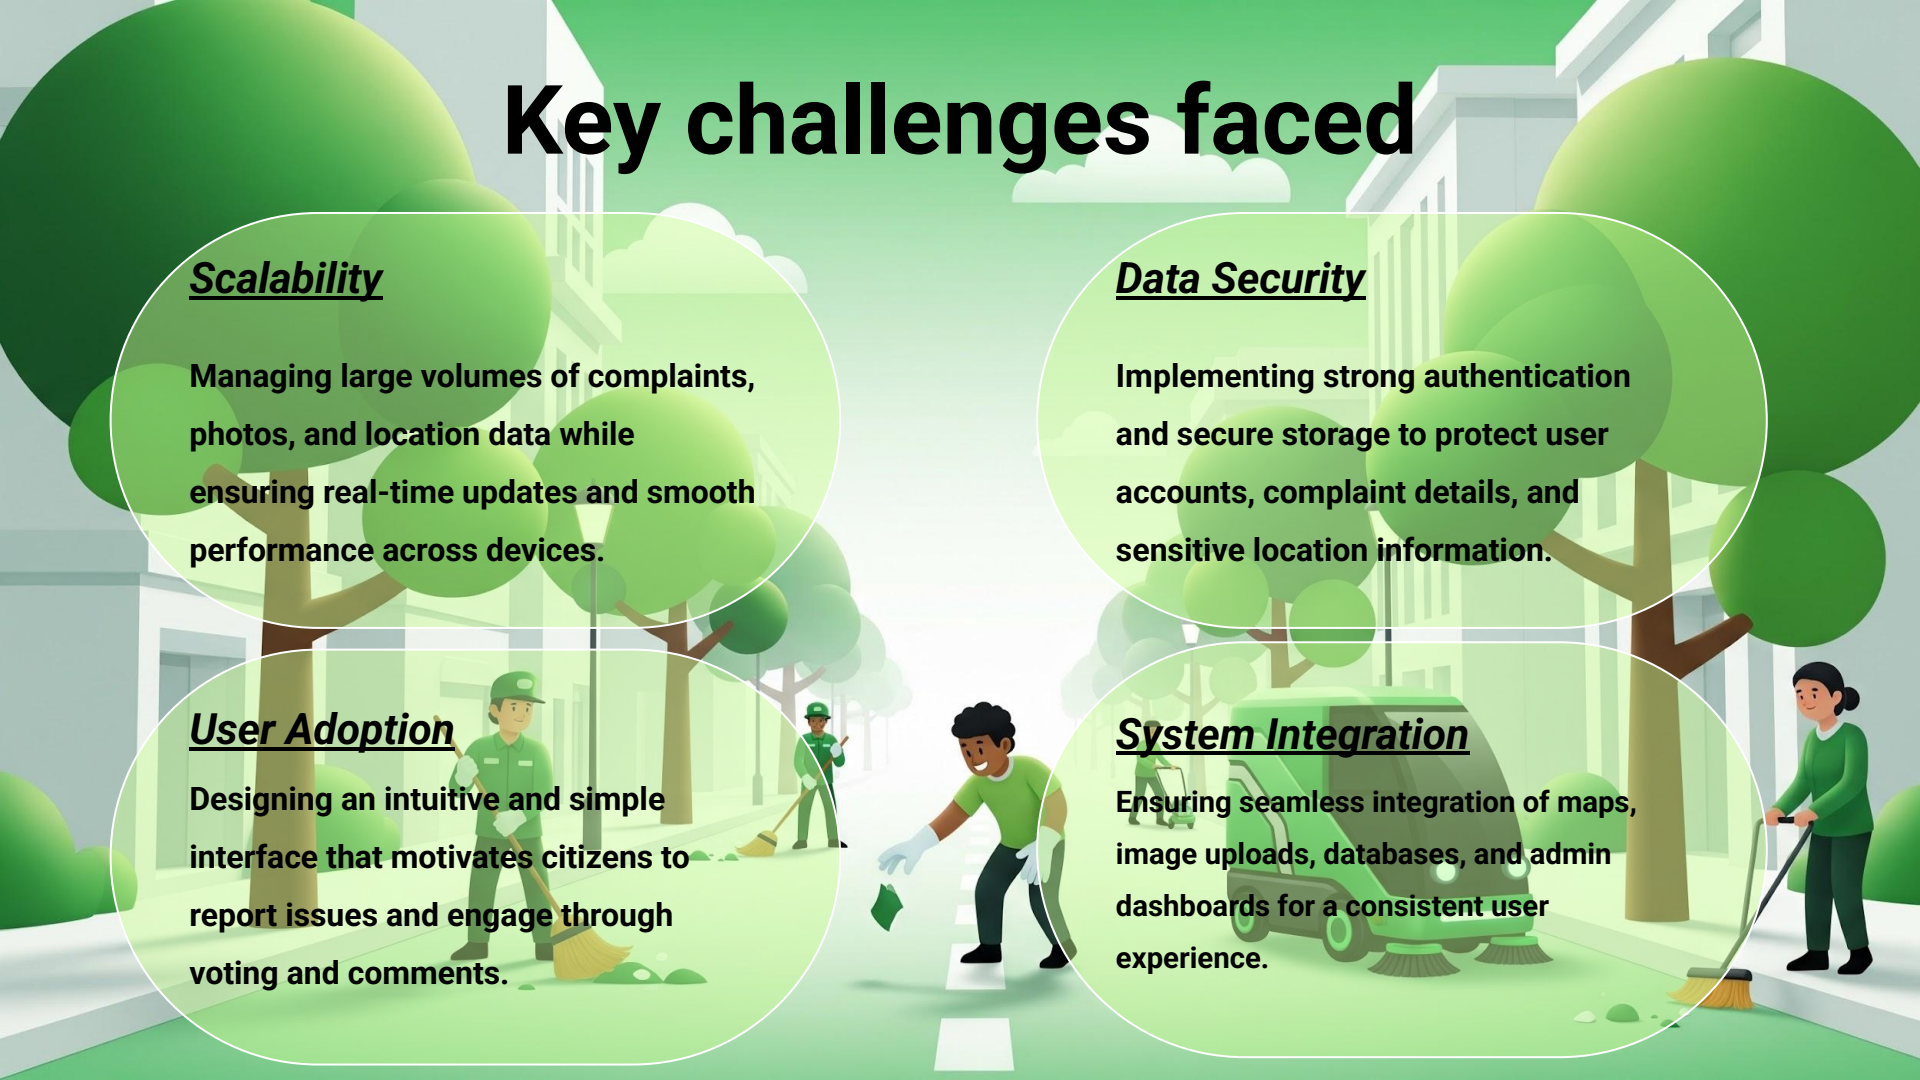

Simple complaint submission, intuitive UI.

**Seamless
Integration:**

*Location services & maps integrated with
complaint forms.*

Key challenges faced

The background of the slide is a vibrant, stylized illustration of a city street. It features green trees, grey buildings, and several people engaged in cleaning activities. One person is sweeping a sidewalk, another is picking up trash, and a third is using a broom near a green cleaning vehicle. The overall theme is urban cleanliness and public service.

Scalability

Managing large volumes of complaints, photos, and location data while ensuring real-time updates and smooth performance across devices.

User Adoption

Designing an intuitive and simple interface that motivates citizens to report issues and engage through voting and comments.

Data Security

Implementing strong authentication and secure storage to protect user accounts, complaint details, and sensitive location information.

System Integration

Ensuring seamless integration of maps, image uploads, databases, and admin dashboards for a consistent user experience.

Challenges and Solutions

Challenges

- *Security & privacy of complaints.*
- *Location-based complaint assignment.*
- *User adoption.*

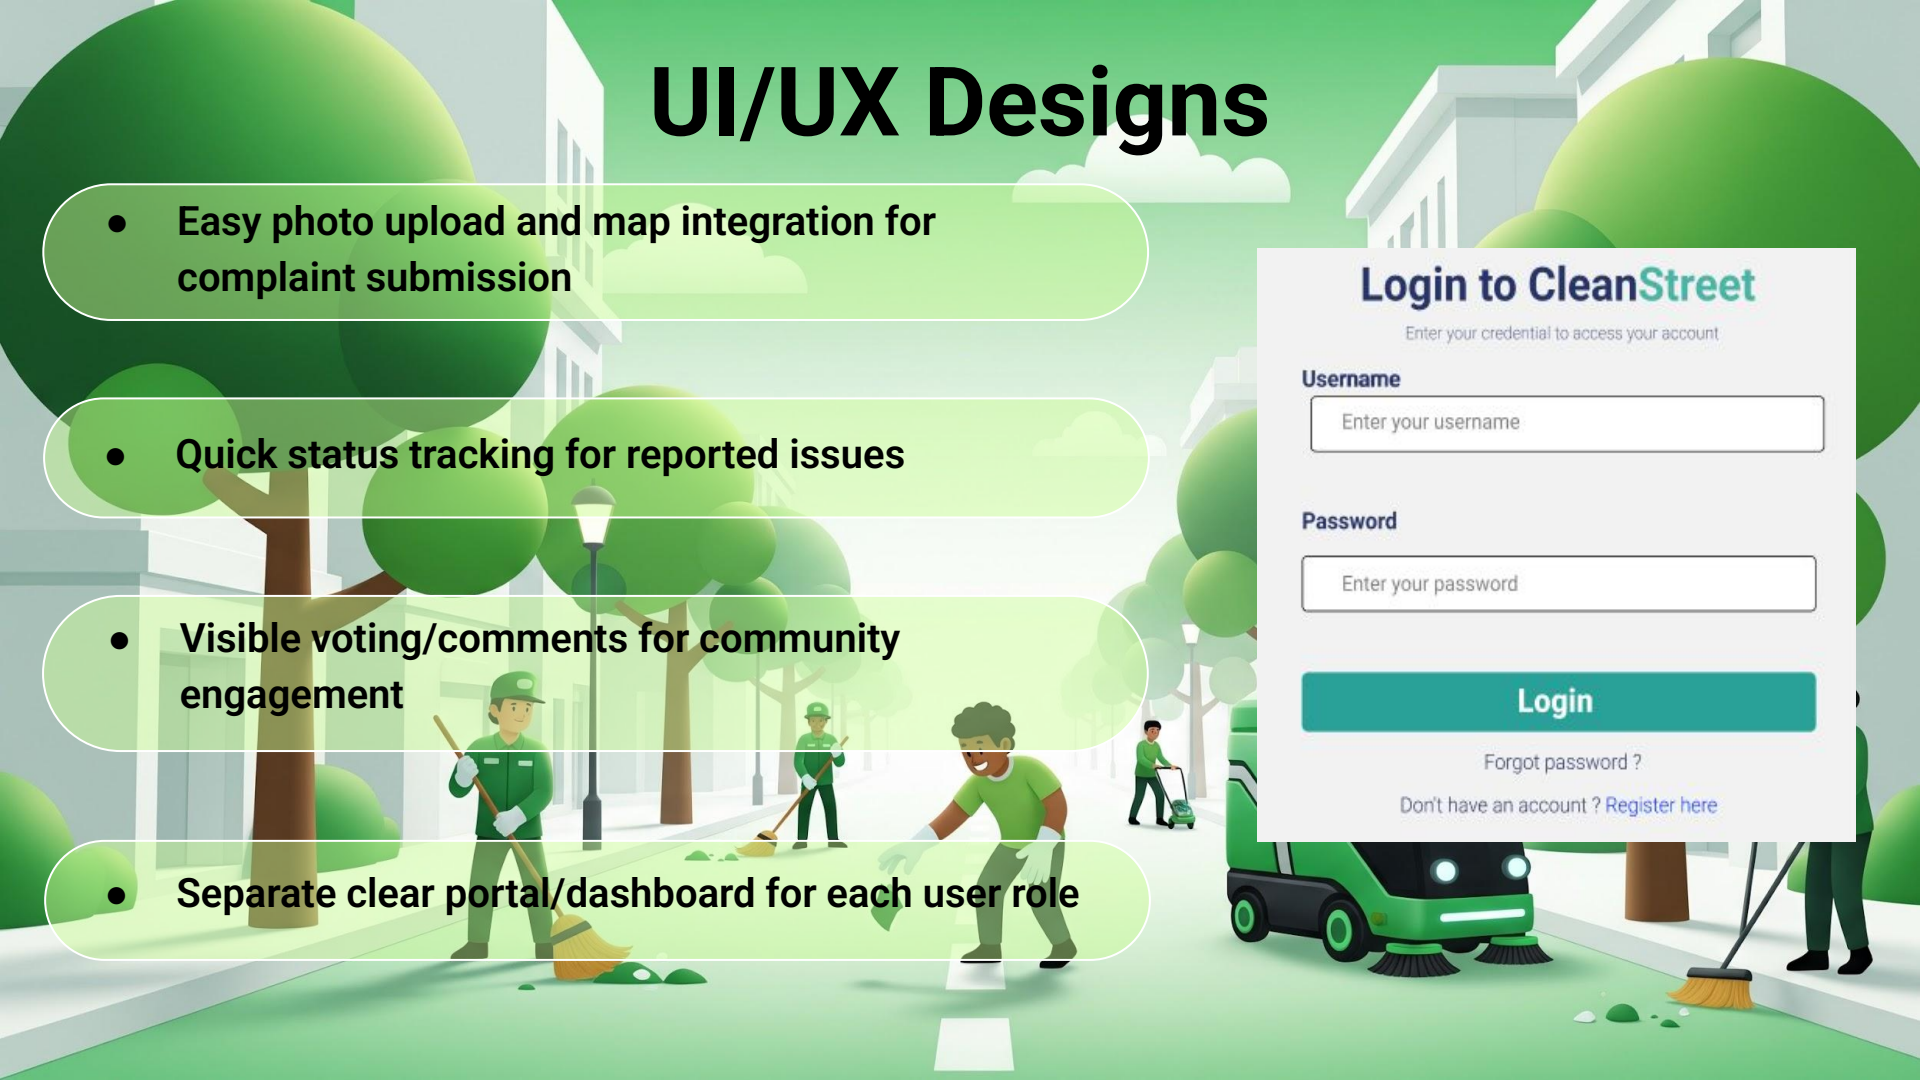

Solutions

- *JWT authentication, encryption.*
- *Map APIs + auto-routing logic.*
- *Simple UI + community voting system.*

UI/UX Designs

- Easy photo upload and map integration for complaint submission
- Quick status tracking for reported issues
- Visible voting/comments for community engagement
- Separate clear portal/dashboard for each user role
